

CHROMEBOOKS FOR LEARNING SCHEME AT LOXFORD

WHY HAVE WE OPTED FOR CHROMEBOOKS?

- They work seamlessly with Google Apps for Education and other cloud-based applications
- Students can personalise their account and add apps to enable them to learn more and work effectively
- They have a long battery life
- Simple technology that just works
- A robust design
- Easy student-teacher workflow
- Large numbers of computers that can be managed centrally
- Excellent collaboration tools
- The beauty of the scheme is that the Chromebook is covered under warranty and insurance for the two year period. You will receive a customer support number which you will contact in the event of a problem.
- The Chromebook will be repaired/replaced under the warranty or insurance.

We are delighted to offer the Chromebooks for Learning Scheme for Loxford Sixth Form students. We are working in partnership with Google and listened to the views of a number of students.

A Chromebook is an instant-on notebook computer with security built-in, long battery life, the best of Google included and access to thousands of apps in the Chrome Web Store, many designed for education and often free.

We are very excited about the impact this scheme will have on the learning of our students and sincerely hope you will share in that excitement as we step together enhancing the future of teaching and learning at Loxford. It is not future technology; it is the present.

Our students embrace mobile phones, Internet and personalised technology. It will be their future working and learning experience.

Chromebooks will help pupils organise, communicate, learn and study at home and in school. Individual access to technology is not something that should happen in a few rooms in a school. With Chromebooks it will be for everyone, everywhere, anytime.

To provide you with the best value for money in terms of both robustness of device and price, we have partnered with a leading ICT supplier.
